

Sheets, Plates, Strips and Fabricated Products

- Monthly production capacity
 Sheets and Plates 2,500 metric tons
 Strips 2,500 metric tons

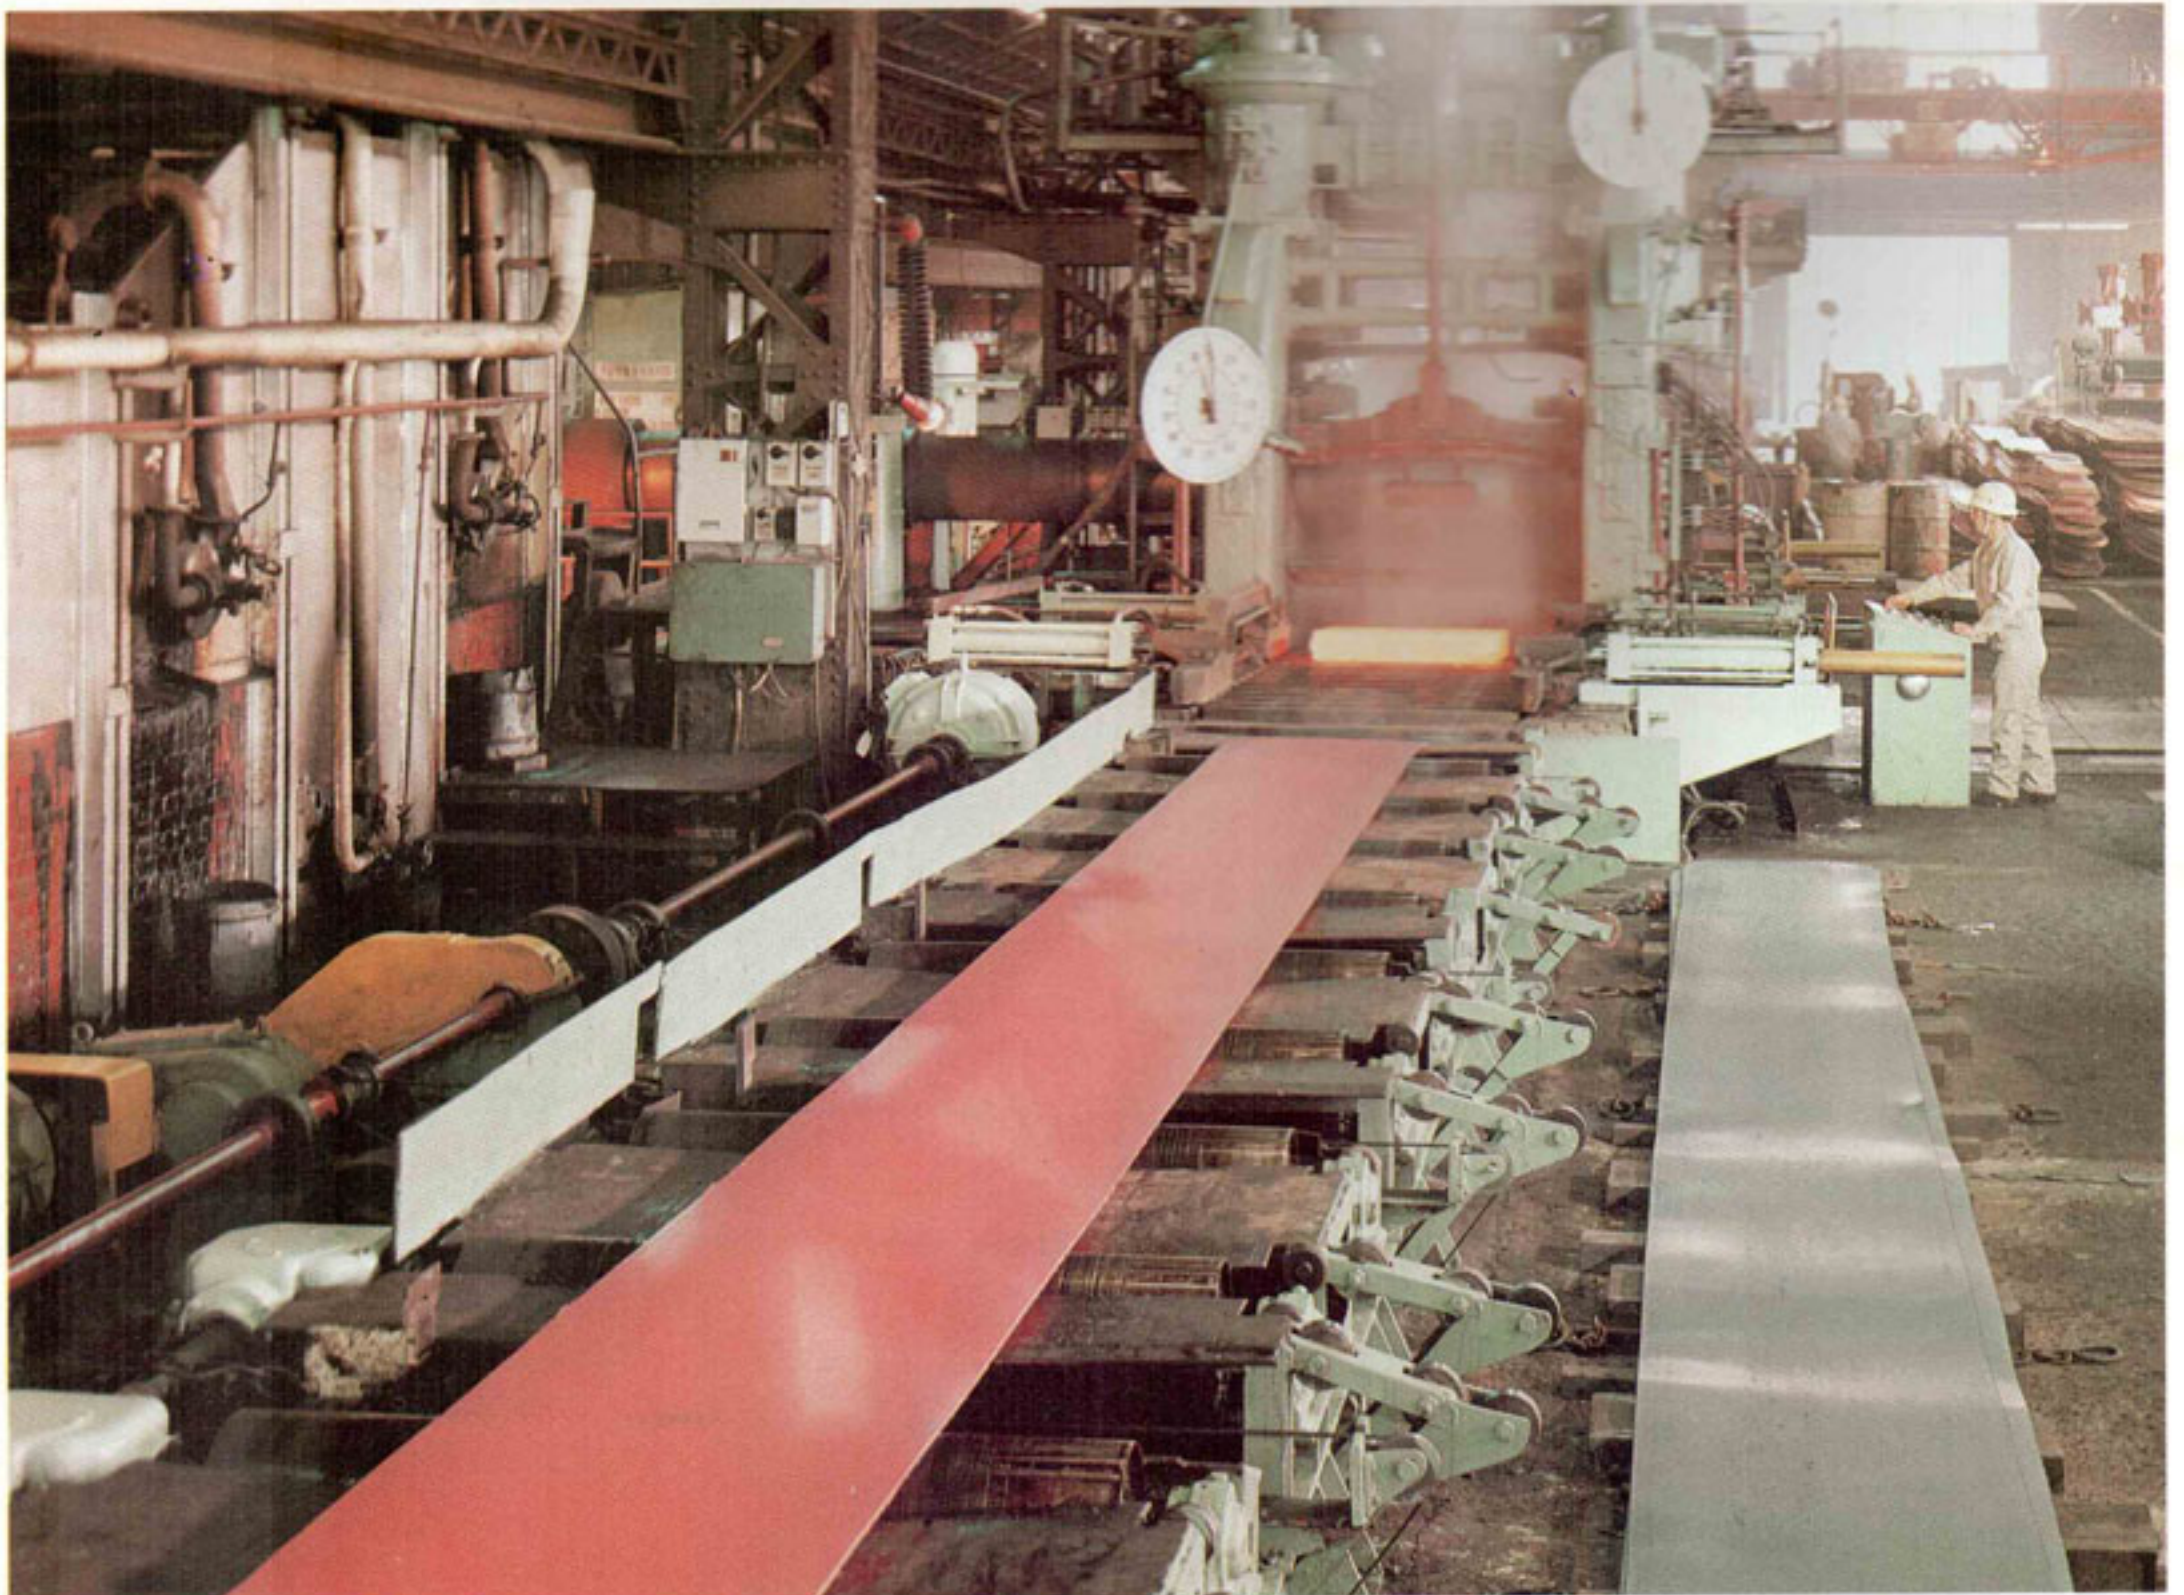

- Range of Sizes: Sheets and Plates

Three high hot breakdown rolling mill.

Architectural parts and components.

Electrical parts and components.

Coin blanks.

Fabricated Products	Advantages
STAMPED PARTS Coin blanks, medals, key blanks, plate fins, washers and other stamped parts.	Our coin blanks and key blanks prove our unsurpassed press work technique.
DRAWN PARTS Heat exchanger for gas-fired boilers for residential use, heat exchanger for instantaneous gas-fired water heaters, architectural panels, water tanks inside steam irons, caps and other drawn parts.	Our ability to select and use the proper material best suited to the degree of fabrication insures the highest quality.
BENT PARTS Fabricated copper bus bars, sheet copper roofs, copper sealing sheets for dam construction, copper contact shoes for smelting furnace, corrugated fins, copper flexible bus bars, copper gutters, copper downspouts, and other similar parts.	Readily installed or assembled into finished products by our customers; we perform such operations as bending, piercing, machining, welding, lacquering, plating, painting, etc.
SPECIALTY PRODUCTS Pattern embossed metal products, hammered (concave) metal products, solar collectors, etching fabrication, and other specialty products.	Ideal for architectural uses. Our unique wide and long-lengths sheet-making technique plus our fabricating experience resulted in specialty products.
